

# Autodesk Fusion Team Solution Snapshot

## Our competitive advantage

Purpose-built for the needs of product design and manufacturing teams, Fusion Team offers a central location to communicate, view, markup and review 2D and 3D project design files from anywhere—simply using a web browser to a mobile device. By giving project access to all team members who need it, product design teams are able to gain consensus faster, make decisions together and speed time to market using Fusion Team.

## What is Fusion Team?

Fusion Team is a cloud-based collaboration tool that enables product design and manufacturing teams to work efficiently together in one central workspace. Users can view, share and review 100+ 2D and 3D file formats from any device, and increase engagement with their customers and supply chains.

## Who uses Fusion Team?

Fusion Team is built for product design and engineering teams and their project stakeholders including customers, manufacturers and their supply chain.

## Where can I use Fusion Team?

Fusion Team is a cloud-based solution, so it works right within a web browser or mobile device. You can login and/or create an account at <http://fusionteam.autodesk.com>

## How much is it?

Fusion Team Subscription Pricing per user is US \$120 / year.

## Where can I find more information?

For more information on Fusion Team, visit our website or sign up for an account: <https://fusionteam.autodesk.com/> or access our Fusion Team Treasure Map on OTS.

## What are the key benefits and business values?

### **Fusion Team transforms collaboration on design and engineering projects:**

Fusion Team transforms the way designers and engineers engage stakeholders and deliver projects by enabling them to:

- Collaborate anywhere with the entire project team
- Make decisions faster and more efficiently
- Share and review models instantly, from any device
- Find the most up-to-date versions of documents and files easily
- Speed time to market for their products

## What are the advantages of Fusion Team?

Communicate as a team in one location. Fusion Team provides one online workspace for all project team members, helping distributed teams stay connected and organized at all times.

### **Connect the entire design team**

Extend the ability to view, comment and markup design models to all team members, not just design authors. Simplify the review process and eliminate the need to email or file transfer large sets of data.

### **Accelerate decision making**

Easily provide or solicit feedback with comment and markup tools. Redline drawings, comment on complex 3D models and keep an organized record of all project feedback.

### **Review in real-time**

Hold live review sessions with built-in browser sharing. Multi-user real-time review facilitates more informed decision making, leading to faster buy-in from customers, stakeholders, and design partners.

### **Track the design process**

Version history and control ensures that every design discipline has access to the latest information. Easily access all historical design iterations and rest assured that no file version is lost or overwritten throughout the life of a project.

### **Access anywhere**

All team members can access critical project information from anywhere—within a web browser or mobile device. Fusion Team mobile is designed for accessibility in the field, in meetings or on-the-go review, share and markup designs anywhere, anytime.
