

# SmartWorks TWAIN

## THE COLORTRAC TWAIN SOLUTION FOR SC AND SG SERIES SCANNERS

For many users of image management software or any software that relies on using a scanner the TWAIN interface will no doubt sound familiar. The Colortrac SmartWorks TWAIN driver provides a simple way to directly control a SmartLF SC or SG Series wide format scanner from inside applications that are compatible with the TWAIN 1.5 standard and other specialist software that supports TWAIN connected scanners.

SmartWorks TWAIN installs itself as a TWAIN plug-in module and is automatically recognized when the application supporting TWAIN is started.

Help and guidelines for operation of Colortrac Twain can be found here.

|                              |   |
|------------------------------|---|
| <b>Supported Scanners</b>    | The following SmartLF scanner models will work with the TWAIN driver<br>SC 25, SC 36, SC 42, SC 25 Xpress, SC 36 Xpress, SC 42 Xpress, SG 36, SG 44   |
| <b>Resolution (dpi)</b>      | 200, 300, 400 50, 600 and 1200 dpi  |
| <b>Summary</b>               | Included as standard with all SmartLF SC Series and SG Series scanners  |
| <b>Color Modes /Controls</b> | <ul style="list-style-type: none"> <li>• 16.7 million RAW RGB color (24-bit)</li> <li>• 8-bit Grayscale</li> <li>• Fixed Threshold Black &amp; White, Paper Size, Resolution, Contrast and Brightness</li> </ul>  |
| <b>Document Type Filters</b> | None by TWAIN itself. The format of images saved from the TWAIN scan is fully dependent on the application running the TWAIN.   |
| <b>Scan to File</b>          | Not available unless provided by the TWAIN interface of the host software   |
| <b>Scan to Email</b>         | Not applicable  |
| <b>Copy</b>                  | Not available   |
| <b>Print</b>                 | Handled by printing the scanned image from the application hosting TWAIN if Print is available. No print drivers or print method is provided by the Twain interface directly  |
| <b>Driver Setup</b>          | Settings are not saved through sessions<br>Scanner speed – full or half-speed<br>Resolution – see above<br>Choose from ISO, ANSI or ARCH paper size standards<br>Units – manual paper size and paper dimensions selectable in/mm                              |
| <b>Reset</b>                 | Changes paper size, resolution, color mode to the program defaults  |
| <b>Scan length limit</b>     | In excess of A0 but depends heavily on the host application and the specification of the computer hardware. Will reduce as resolution increases   |
| <b>Copy length limit</b>     | Not applicable  |
| <b>Languages</b>             | English only  |
| <b>System Compatibility</b>  | Windows 8, Windows 7, Windows Vista   |
| <b>Notes</b>                 | <ol style="list-style-type: none"> <li>1. Only one scan application or scanner utility program can be operated with SmartLF scanners at the same time</li> <li>2. See System Requirements for more information on USB3 and computer specifications</li> </ol> |
